SUMMARY

As a co-founder of Kyoora, a team of highly motivated programmers, I provide web and mobile solutions for various clients and share tips and tutorials on different programming languages. I have rich experience in web development, especially in backend development, REST API, and database optimization. I am also a private tutor for junior programmers, teaching more than five programming languages and mentoring more than 50 people. I create materials for the students and help them learn the best practices and latest technologies in the field. I am energetic, curious, and always looking for something new to learn.
